MBA IN I.T. PROJECT MANAGEMENT

“*Global degrees that take you all over the world.*

Project management is delivering value to businesses worldwide. Whether you specialize in technology, business, finance, or any other field the success of an organization depends on the successful implementation of the projects carried out within the organization.

Management skills are needed by an Engineer, manufacturer, Technocrat, Logistics professional as well as a business person. It touches all walks of corporate life in one way or another. All activities carried out across professions and organizations ultimately bear fruit on the successful implementation of the project. Every department of every organization will constantly have activities and tasks which will be classified under a project category and overlooked by an expert. Every organization needs someone who can best execute the projects at hand. As an I.T. project manager, you would be required to ensure that complex technical projects, such as systems upgrades and technology deployments, are completed on time, under budget, and to specifications. You will have to plan and coordinate the efforts of the internal project team, third-party contractors, and consultants to bring IT projects to successful completion.

This MBA degree backs the fact and is proof that you are capable of managing and executing large and complex projects across organizations. The organizations will safely entrust you with the management of their large and key products.

WHY TAKE UP MBA IN I.T. PROJECT MANAGEMENT?

- ▶ **Own the project, own the business** – Project managers are on the frontlines of the business, helping to turn intangible things like goals and values into solid results that move the needle. Project managers have a great opportunity to make their mark on the business and improve how work gets done. Amongst roles, it is a greatly respected one.
- ▶ **Sought-after skills with a unique specialization** – I.T. project management skills are in high demand as an increasing number of organizations prefer specialists and project-based methods to get the job done right, the first time. I.T. project managers are unique in a way in which they're focused solely on the I.T. needs of an organization and handle their varied duties and responsibilities with the help of robust I.T. project management software.
- ▶ **Interesting role providing great insights** – Project Management is at the heart of businesses. Due to its interdisciplinary nature, it allows you to be the SPOC between departments, among stakeholders, between the top management and execution team, and even between the business and the client or vendor. It continues to remain an interesting profile because you get to interact with experts from all disciplines and gain knowledge of their respective domains which adds to your subject matter expertise, thereby helping you manage better.
- ▶ **Get ready to join the C-suite** – Project managers are some of the best candidates to be CEOs because to carry out the usual work they have to bring together all the disparate aspects of theory, reality, vision, process, finances, value, politics, and human nature to create successful outcomes. Project managers often manage projects that cross all organizational functions and get to see the organization as a whole entity rather than from the "siloed" view of a particular functional program for years within an industry or across industries.

WHY TAKE UP MBA IN I.T. PROJECT MANAGEMENT?

- ▶ **Growing Industry and Attractive Prospects** - I.T. Project Management professionals are drawing attractive compensations owing to their capabilities to face challenges in complex scenarios. As per PayScale, the average salary for a Project Manager, Information Technology (I.T.) is \$88,619. The upper end of the highest range can go to \$1,40,000 and beyond.
- ▶ **Impact on the Global Economy** - Project managers contribute to a nation's productivity, which supports GDP that in turn contributes to the standard of living. Looking globally, an estimated GDP output of project-oriented industries will reach \$20.2 trillion in the next decade, while the lack of qualified talent could result in a potential loss of billions of dollars. This signifies how Project management has an enormous potential in driving economic growth.
- ▶ **A trending career** - Today, the demand for project management specialists keeps growing. The data by PMI predicts exponential growth for the next decade. It is expected that employers will need around 87.7 million project management professionals by 2027. The BLS predicts the fastest growth rate for project managers in I.T., i.e., 12 percent, faster than the average for all occupations. Also, in the last 5 years, the U.S. healthcare sector showed a 17% increase in project-oriented jobs – the biggest growth rate compared to other sectors.

The Project Management career progression is an interesting one since in a way it prepares you for the C-suite roles. Some of the interesting opportunities are as below:
